Civil Engineering Department

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : **Civil Engineering**

Semester: **3rd Sem**

Session : **Aug-Nov 2025**

Subject: **Construction Material**

Name of the teacher : **Er Neha Thakur**

Designation: **Lecturer Civil Engg.**

Sr No	Week / Month	Name of the chapter	Contents taught	Remarks
1	1st (04Aug- 08Aug)	Unit – I: Overview of Construction Materials	Scope of construction materials in Building Construction, Transportation Engineering, Environmental Engineering, Irrigation Engineering (applications only).	
2	2nd (11Aug- 14Aug)		Selection of materials for different civil engineering structures based on strength, durability, Eco friendly and economy .Broad classification of materials – Natural, Artificial, special, finishing and recycled	
3	3rd (18Aug- 23Aug)	Unit – II: Natural Construction Materials	Requirements of good building stone; general characteristics of stone; quarrying and dressing methods and tools for stone. Structure of timber, general properties and uses of good timber,	
4	4th (25 Aug - 30Aug)		different methods of seasoning for preservation of timber, defects in timber, use of bamboo in construction	
5	5th (01Sep- 06Sep)		Asphalt, bitumen, and tar used in construction, properties and uses. Properties of lime, its types and uses. Types of soil and its suitability in construction Properties of sand and uses .Classification of coarse aggregate according to size	
6	6th (08 Sep -12 Sep)	Unit- III: Artificial Construction Materials	1st Class Test & Constituents of brick earth, Conventional / Traditional bricks, Modular and Standard bricks,	
7	7th (15 Sep- 20 Sep)		Special bricks –fly ash bricks, Characteristics of good brick Field tests on Bricks, Classification of burnt clay bricks and their suitability, Manufacturing process of burnt clay brick, fly ash bricks, Aerated concrete blocks.	
8	8th (22Sep- 27 Sep)		Flooring tiles – Types, uses ,Manufacturing process of Cement - dry and wet (only flow chart), types of cement and its uses. Field tests on cement	
9	9th (29 Sep -04 Oct)		Pre-cast concrete blocks- hollow, solid, pavement blocks, and their uses. Plywood, particle board, Veneers, laminated board and their uses. Types of glass: soda lime glass, lead glass and borosilicate glass and their uses. Ferrous and non-ferrous metals and their uses.	
10	10th (06 Oct- 10 Oct)	Unit– IV: Special	Types of material and suitability in construction works of following materials: Water proofing, Termite proofing; Thermal and sound insulating materials.	

11	11th (13 Oct-18 Oct)	Construction Materials	2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025)	
12	12th (21 Oct-25 Oct)		Fibers – Types –Jute, Glass, Plastic Asbestos Fibers. Geo polymer cement: Geo-cement: properties, uses	
13	13th (27 Oct-01 Nov)	Unit– V: Processed Construction Materials	Constituents and uses of POP (Plaster of Paris)POP finishing boards, sizes, and uses. Paints- whitewash, cement paint, Distempers, Oil Paints and Varnishes with their uses. (Situations where used).	
14	14th (03 Nov -07 Nov)		Industrial waste materials- Fly ash, Blast furnace slag, Granite and marble polishing waste and their uses. Agro waste materials - Rice husk, Bagasse, coir fibers and their uses	
15	15th (10 Nov-15 Nov)		House Test (Centralized)	
16	16th (17Nov-26Nov)		Special processed construction materials; Geo synthetic, Ferro Crete, Artificial timber, Artificial sand, and their uses.

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : Civil Engineering

Subject: Basic Surveying (CEPC203)

Semester: 3rd Sem

Name of the teacher : Er Naveen Bharti

Session: Aug- Nov 2025

Designation : Lecturer Civil Engg

Sr No	Week/Month	Name of the chapter	Topics to be covered	Remarks
1	1st (1st Aug-08Aug)	Unit –1 Overview and Classificati on of Survey	Survey- Purpose and Use. <input type="checkbox"/> Types of surveying- Primary and Secondary, Classification: Plane, Geodetic, Cadastral, Hydrographic, Photogrammetry and Aerial.	
2	2nd (11Aug-14Aug)		Principles of Surveying. Scales: Engineer's scale, Representative Fraction (RF) and diagonal scale.	
3	3rd (18Aug-23Aug)	Unit– 2 Chain Surveying	Instruments used in chain survey: Metric Chain, Tapes, Arrow, ranging rod, Line ranger, Offset rod, Open cross staff, Optical square.	
4	4th (25 Aug -30Aug)		<input type="checkbox"/> Chain survey Station, Base line, Check line, Tie line, Offset, Tie station. Ranging: Direct and Indirect Ranging.	
5	5th (01Sep-06Sep)		<input type="checkbox"/> Methods of Chaining, obstacles in chaining. <input type="checkbox"/> Errors in length: Instrumental error, personal error, error due to natural cause, random error. <input type="checkbox"/> Principles of triangulation. <input type="checkbox"/> Types of offsets: Perpendicular and Oblique. <input type="checkbox"/> Conventional Signs, Recording of measurements in a field book.	
6	6th (08Sep -12Sep)	Unit– 3 Compass Traverse Survey	1st Class Test <input type="checkbox"/> Compass Traversing- open, closed. <input type="checkbox"/> Technical Terms: Geographic/ True Magnetic Meridians and Bearings, Whole Circle Bearing system and Reduced Bearing system and examples on conversion of given bearing to another bearing, Fore Bearing and Back Bearing,	
7	7th (15Sep-20Sep)		Calculation of internal and external angles from bearings at a station, Dip of Magnetic needle, Magnetic Declination. Components of Prismatic Compass and their Functions, Methods of using Prismatic Compass-Temporary adjustments and observing bearings.	
8	8th (22Sep-27Sep)		Local attraction, Methods of correction of observed bearings - Correction at station and correction to included angles.	

9	9th (29Sep -04Oct)	Unit– 4 Leveling and Contouring	Basic terminologies: Level surfaces, Horizontal and vertical surfaces, Datum, Benchmarks- GTS, Permanent, Arbitrary and Temporary, Reduced Level, Rise, Fall, Line of collimation, Station, Back sight, Fore sight, Intermediate sight, Change point, Height of instruments.
10	10th (06Oct- 10Oct)		<input type="checkbox"/> Types of levels: Dumpy, Tilting, Auto level, Digital level, Components of Dumpy Level and its fundamental axes, Temporary adjustments of Level. <input type="checkbox"/> Types of Levelling Staff: Self-reading staff and Target staff. Reduction of level by Line of collimation and Rise and Fall Method.
11	11th (13Oct-18Oct)		2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025) <input type="checkbox"/> Levelling Types: Simple, Differential, Fly, Profile and Reciprocal Levelling.
12	12th (21Oct-25Oct)		Contour, contour intervals, horizontal equivalent, Uses of contour maps
13	13th (27Oct-01Nov)		<input type="checkbox"/> Characteristics of contours, Methods of Contouring: Direct and indirect
14	14th (03Nov - 07Nov)	Unit– 5 Measurem ent of Area and Volume	<input type="checkbox"/> Components and use of Digital planimeter. <input type="checkbox"/> Measurement of area using digital planimeter.
15	15th (10Nov-15Nov)		House Test (Centralized)
16	16th (17Nov-26Nov)		<input type="checkbox"/> Measurement of volume of reservoir from contour map.

Semester: 3rd Sem.

Session: Aug - Nov 2025

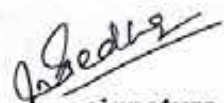

Subject: Mechanics of Materials

Name of the teacher : Sumedha Sharma

Designation- Lecturer Civil Engg.

SR. No.	Week/Month	Name of the chapter	Topics to be covered	Remarks
1	1st (01Aug- 08Aug)	Unit- 1 Moment of Inertia	Definition, M.I. of plane lamina, Radius of gyration, section modulus, Parallel and Perpendicular axes theorems (without derivations), M.I. of rectangle, square, circle, semi-circle, quarter circle and triangle section (without derivations).	
2	2nd (11Aug- 14Aug)		M.I. of symmetrical and unsymmetrical I-section, Channel section, T-section, Angle section	
3	3rd (18Aug- 23Aug)		Hollow sections about centroidal axes. Polar Moment of Inertia of solid circular sections.	
4	4th (25 Aug - 30Aug)	Unit- 2 Simple Stresses and Strains	Definition of rigid, elastic and plastic bodies, Definition of stress, strain, elasticity, Hook's law, Elastic limit, Modulus of elasticity. Type of Stresses-Normal, Direct, Bending and Shear and nature of stresses i.e., Tensile and Compressive stresses Standard stress strain curve for tor steel bar under tension, Yield stress, Proof stress, Ultimate stress, Strain at various critical points, Percentage elongation and Factor of safety Deformation of body due to axial force, forces applied at intermediate sections, Maximum and minimum stress induced, Composite section under axial loading	
5	5th (01Sep- 06Sep)		Concept of temperature stresses and strain, Stress and strain developed due to temperature variation in homogeneous simple bar (no composite section) Longitudinal and lateral strain, Modulus of Rigidity, Poisson's ratio, volumetric strain, change in volume, Bulk modulus (Introduction only). Relation between modulus of elasticity, modulus of rigidity and bulk modulus (without derivation).	
6	6th (08 Sep -12 Sep)	Unit- 3 Shear Force and Bending Moment	CLASS TEST- I , Types of supports, beams, and loads. Concept and definition of shear force and bending moment, Relation between load, shear force and bending moment (without derivation). Shear force and bending moment diagram for cantilever beams	
7	7th (15 Sep- 20 Sep)		Shear force and bending moment diagram for simply supported beams subjected to point loads	
8	8th (22Sep- 27 Sep)		Shear force and bending moment diagram for simply supported beams subjected to uniformly distributed loads (combination of any two types of loading), point of contra flexure.	

9	9th (29 Sep -04 Oct)	Unit- 4 Bending and Shear Stresses in beams	Concept and theory of pure bending, assumptions, flexural equation (without derivation), bending stresses and their nature, bending stress distribution diagram.	
10	10th (06 Oct- 10 Oct)		Concept of moment of resistance and simple numerical problems using flexural equation.	
11	11th (13 Oct-18 Oct)		Shear stress equation (without derivation), relation between maximum and average shear stress for rectangular and circular section, shear stress distribution diagram. CLASS TEST - II	
12	12th (21Oct-25 Nov)		Shear stress distribution for square, rectangular, circle, hollow, angle sections, channel section, I-section, T section. Simple numerical problems based on shear equation.	
13	13th (27 Nov-01 Nov)	Unit- 5 Columns	Concept of compression member, short and long column, Effective length, Radius of gyration, Slenderness ratio	
14	14th (03 Nov -07 Nov)		Types of end condition for columns, Buckling of axially loaded columns. Euler's theory, assumptions made in Euler's theory and its limitations,	
15	15th (10 Nov-15 Nov)		HOUSE TEST	
16	16th (17Nov-26Nov)		Rankine' s formula and its application to calculate crippling load. Concept of working load/safe load, design load and factor of safety. Application of Euler's equation to calculate buckling load

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : Civil Engineering

Semester: 3rd Sem

Session: Aug- Nov 2025

Subject: Building Construction (CEPC207)

Name of the teacher : Er Naveen Bharti

Designation : Lecturer Civil Engg

Sr No	Week/Month	Name of the chapter	Topics to be covered	Remarks
1	1st (1st Aug-08Aug)	Unit – I: Overview of Building Component s	Classification of Buildings as per National Building Code Group A to I, as per Types of Constructions- Load Bearing Structure, Framed Structure, Composite Structure. □ Building Components - Functions of Building Components, Substructure – Foundation, Plinth.	
2	2nd (11Aug-14Aug)		□ Superstructure – Walls, Partition wall, Cavity wall, Sill, Lintel, Doors and Windows, Floor, Roof, Columns, Beams, Parapet.	
3	3rd (18Aug-23Aug)	Unit – II: Constructio n of Substructur e	Job Layout: Site Clearance, Layout for Load Bearing Structure and Framed Structure by Center Line and Face Line Method, Precautions. □ Earthwork: Excavation for Foundation, Timbering and Strutting, Earthwork for embankment, Material for plinth Filling, Tools and plants used for earthwork.	
4	4th (25 Aug -30Aug)		Foundation: Functions of foundation, Types of foundation – Shallow Foundation, Stepped Footing, Wall Footing, Column Footing, Isolated and Combined Column Footing, Raft Foundation, Grillage Foundation. Deep Foundation - Pile Foundation, Well foundation.	
5	5th (01Sep-06Sep)	Unit- III: Constructio n of Superstruct ure	Stone Masonry: Terms used in stone masonry- facing, backing, hearting, through stone, corner stone, cornice. Types of stone masonry: Rubble masonry, Ashlar Masonry, and their types. Joints in stone masonry and their purpose. Selection of Stone Masonry, Precautions to be taken in Stone Masonry Construction.	
6	6th (08Sep -12Sep)		1st Class Test □ Brick masonry: Terms used in brick masonry- header, stretcher, closer, quoins, course, face, back, hearting, bat bond, joints, lap, frog line, level and plumb. Bonds in brick masonry- header bond, stretcher bond, English bond and Flemish bond.	
7	7th (15Sep-20Sep)		Requirements of good brick masonry. Junctions in brick masonry and their purpose and procedure. Precautions to be observed in Brick Masonry Construction. Comparison between stone and Brick Masonry. Tools and plants required for construction of stone and brick masonry. Hollow concrete block masonry and composite masonry.	

8	8th (22Sep-27Sep)	Unit- III: Constructio n of Superstruct ure	Scaffolding and Shoring: Purpose, Types of Scaffolding, Process of Erection and Dismantling. Purpose and Types of Shoring, Underpinning. Formwork: Definition of Formwork, Requirements of Formwork, Materials used in Formwork, Types of Formworks, Removal of formwork.
9	9th (29Sep -04Oct)	Unit- IV: Building Communic ation and Ventilation	Horizontal Communication: Doors – Horizontal Communication: Doors – Components of Doors, Full Panelled Doors, Partly Panelled and Glazed Doors, Flush Doors, Collapsible Doors, Rolling Shutters, Revolving Doors, Glazed Doors. Sizes of Door recommended by BIS.
10	10th (06Oct- 10Oct)		Windows: Component of windows, Types of Windows - Full Panelled, Partly Panelled and Glazed, wooden, Steel, Aluminium windows, Sliding Windows, Louvered Window, Bay window, Corner window, clear-storey window, Gable and Dormer window, Skylight. Sizes of Windows recommended by BIS. Ventilators.
11	11th (13Oct-18Oct)		2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025) Vertical Communication: Means of Vertical Communication- Stair Case, Terms used in staircase-steps, tread, riser, nosing, soffit, waist slab, baluster, balustrade, scotia, handrails, newel post, landing, headroom, winder.
12	12th (21Oct-25Oct)		Types of staircases (On the basis of shape): Straight, dog-legged, open well, Spiral, quarter turn, bifurcated, three quarter turn and Half turn, (On the basis of Material): Stone, Brick, R.C.C., wooden and Metal
13	13th (27Oct-01Nov)	Unit- V: Building Finishes	Floors and Roofs: Types of Floor Finishes and its suitability- Kota, Marble, Granite, Ceramic Tiles, Vitrified, Concrete Floors, wooden Flooring, Skirting and Dado.
14	14th (03Nov - 07Nov)		Process of Laying and Construction, Finishing and Polishing of Floors, Roofing Materials- RCC, Mangalore Tiles, AC Sheets, G.I. sheets, Corrugated G.I. Sheets, Plastic and Fibre Sheets. Types of Roofs: Flat roof, Pitched Roof-King Post truss, Queen Post Truss, terms used in roofs. Wall Finishes: Plastering – Necessity of Plastering, Procedure of Plastering, Single Coat Plaster, Double Coat Plaster, Rough finish, Neeru
15	15th (10Nov-15Nov)		House Test (Centralized)
16	16th (17Nov-26Nov)		Finishing and Plaster of Paris (POP). Special Plasters- Stucco plaster, sponge finish, pebble finish. Precautions to be taken in plastering, defects in plastering. Pointing – Necessity, Types of pointing and procedure of Pointing. Painting –Necessity, Surface Preparation for painting, Methods of Application.

Name of the teacher : Er. Parveen Kumar

Designation : Lecturer Civil Engg

Sr No	Week / Month	Name of the chapter	Topics to be covered	Remarks
1	1st (01Aug- 08Aug)	Unit – I Cement, Aggregates and Water	Unit – I Cement, Aggregates and Water <input type="checkbox"/> Physical properties of OPC and PPC: fineness, standard consistency, setting time, soundness, compressive strength. Different grades of OPC and relevant BIS codes <input type="checkbox"/> Storage of cement and effect of storage on properties of cement. <input type="checkbox"/> BIS Specifications and field applications of different types of cements: Rapid hardening, Low heat, Portland pozzolana, Sulphate resisting, Blast furnace slag, High Alumina and White cement.	
2	2nd (11Aug- 14Aug)		<input type="checkbox"/> Aggregates: Requirements of good aggregate, Classification according to size and shape. <input type="checkbox"/> Fine aggregates: Properties, size, specific gravity, bulk density, water absorption and bulking, fineness modulus and grading zone of sand, silt content and their specification as per IS 383. Concept of crushed Sand.	
3	3rd (18Aug- 23Aug)		<input type="checkbox"/> Coarse aggregates: Properties, size, shape, surface texture, water absorption, soundness, specific gravity and bulk density, fineness modulus of coarse aggregate, grading of coarse aggregates, crushing value, impact value and abrasion value of coarse aggregates with specifications. <input type="checkbox"/> Water: Quality of water, impurities in mixing water and permissible limits for solids as per IS: 456.	
4	4th (25 Aug - 30Aug)	Unit– II Concrete	Unit– II Concrete <input type="checkbox"/> Concrete: Different grades of concrete, provisions of IS 456. <input type="checkbox"/> Duff Abraham water cement (w/c) ratio law, significance of w/c ratio, selection of w/c ratio for different grades, maximum w/c ratio for different grades of concrete for different exposure conditions as per IS 456.	
5	5th (01Sep- 06Sep)		<input type="checkbox"/> Properties of fresh concrete: Workability: Factors affecting workability of concrete. Determination of workability of concrete by slump cone, compaction factor, Vee-Bee Consistometer. Value of workability requirement for different types of concrete works. Segregation, bleeding, and preventive measures. <input type="checkbox"/> Properties of Hardened concrete: Strength, Durability, Impermeability.	
6	6th (08Sep -12Sep)	Unit– III Concrete Mix Design and Testing of Concrete	Class Test - I Unit– III Concrete Mix Design and Testing of Concrete <input type="checkbox"/> Concrete mix design: Objectives, methods of mix design, study of mix design as per IS 10262 (only procedural steps). <input type="checkbox"/> Testing of concrete, determination of compressive strength of concrete cubes at different ages, interpretation, and co-relation of test results.	
7	7th (15Sep- 20Sep)		<input type="checkbox"/> Non- destructive testing of concrete: Rebound hammer test, working principle of rebound hammer and 15 factor affecting the rebound index, Ultrasonic pulse velocity test as per IS 13311 (part 1 and 2), Importance of NDT tests.	
8	8th (22Sep- 27Sep)	Unit– IV Quality Control of Concrete	Unit– IV Quality Control of Concrete <input type="checkbox"/> Concreting Operations: Batching, Mixing, Transportation, Placing, Compaction, Curing and Finishing of concrete.	
9	9th (29Sep -04Oct)		<input type="checkbox"/> Forms for concreting: Different types of form works for beams, slabs, columns, materials used for form work, requirement of good form work. Stripping time for removal of form works per IS 456.	
10	10th (06Oct- 10Oct)		<input type="checkbox"/> Waterproofing: Importance and need of waterproofing, methods of waterproofing and materials used for waterproofing. <input type="checkbox"/> Joints in concrete construction: Types of joints, methods for joining old and new concrete, materials used for filling joints.	
11	11th (13Oct-18Oct)		2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025)	
12	12th (21Oct-25Oct)	Unit– V Chemical Admixture, Special Concrete and Extreme Weather concreting	Unit– V Chemical Admixture, Special Concrete and Extreme Weather concreting <input type="checkbox"/> Admixtures in concrete: Purpose, properties and application for different types of admixtures such as accelerating admixtures, retarding admixtures, water reducing admixtures, air entraining admixtures and super plasticizers.	
13	13th (27Oct-01Nov)		<input type="checkbox"/> Special Concrete: Properties, advantages and limitation of following types of Special concrete: Ready mix Concrete, Fibre Reinforced Concrete, High performance Concrete Self-compacting concrete and light weight concrete.	
14	14th (03Nov -07Nov)		<input type="checkbox"/> Cold weather concreting: effect of cold weather on concrete, precautions to be taken while concreting in cold weather condition.	
15	15th (10Nov-15Nov)		House Test (Centralized)	
16	16th (17Nov-26Nov)		<input type="checkbox"/> Hot weather concreting: effect of hot weather on concrete, precautions to be taken while concreting in hot weather condition.

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : Civil Engineering

Semester: 3rd Sem

Session : Aug-Nov 2025

Subject: Geotechnical Engg.

Name of the teacher : Er Neha Thakur

Designation: Lecturer Civil Engg.

Sr No	Week / Month	Name of the chapter	Contents taught	Remarks
1	1st (04Aug- 08Aug)	Unit – I Overview of Geology and Geotechnical Engineering	Introduction of Geology, Branches of Geology, Importance of Geology for civil engineering structure and composition of earth, Definition of a rock: Classification based on their genesis (mode of origin),	
2	2nd (11Aug- 14Aug)		formation, Classification, and engineering uses of igneous, sedimentary, and metamorphic rocks Importance of soil as construction material in Civil engineering structures and as foundation bed for structures.	
3	3rd (18Aug- 23Aug)		Field application of geotechnical engineering for foundation design, pavement design, design of earth retaining structures, design of earthen dam	
4	4th (25 Aug - 30Aug)	Unit– II Physical and Index Properties of Soil	Soil as a three-phase system, water content, determination of water content by oven drying method as per BIS code, void ratio, porosity and degree of saturation, density index. Unit weight of soil mass – bulk unit weight, dry unit weight, unit weight of solids	
5	5th (01Sep- 06Sep)		saturated unit weight, submerged unit weight. Determination of bulk unit weight and dry unit weight by core cutter and sand replacement method, Consistency of soil, Atterberg limits of consistency: Liquid limit, plastic limit and shrinkage limit. Plasticity index	
6	6th (08 Sep -12 Sep)		1st Class Test & Particle size distribution test and plotting of curve, Determination of effective diameter of soil, well graded and uniformly graded soils, BIS	
7	7th (15 Sep- 20 Sep)	Unit– III Permeability and Shear Strength of	Definition of permeability, Darcy's law of permeability, coefficient of permeability factors affecting permeability, determination of coefficient of permeability by constant head and falling head tests	
8	8th (22Sep- 27 Sep)		simple problems to determine coefficient of permeability. Seepage through earthen structures, seepage velocity, seepage pressure, phreatic line, flow lines, application of flow net,	

9	9th (29 Sep -04 Oct)	Soil	Shear failure of soil, concept of shear strength of soil. Components of shearing resistance of soil – cohesion, internal friction. Mohr-Coulomb failure theory, Strength envelope, strength equation for purely cohesive and cohesion less soils. Direct shear and vane shear test – laboratory methods
10	10th (06 Oct- 10 Oct)	Unit– IV Bearing Capacity of Soil	Bearing capacity and theory of earth pressure. Concept of bearing capacity, ultimate bearing capacity, safe bearing capacity and allowable bearing pressure
11	11th (13 Oct-18 Oct)		2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025)
12	12th (21 Oct-25 Oct)		Introduction to Terzaghi's analysis and assumptions, effect of water table on bearing capacity. Field methods for determination of bearing capacity – Plate load and Standard Penetration Test. Test procedures as per IS:1888 & IS:213
13	13th (27 Oct-01 Nov)		Definition of earth pressure, Active and Passive earth pressure for no surcharge condition, coefficient of earth pressure
14	14th (03 Nov -07 Nov)	Unit– V Compaction and stabilization of soil	Concept of compaction, Standard and Modified proctor test as per IS code, Plotting of Compaction curve for determining: Optimum moisture content (OMC), maximum dry density (MDD), Zero air voids line. Factors affecting compaction field methods of compaction – rolling, ramming and vibration. Suitability of various compaction equipment -smooth wheel roller, sheep foot roller, pneumatic tyre roller, Rammer and Vibrator, Difference between compaction and consolidation
15	15th (10 Nov-15 Nov)		House Test (Centralized)
16	16th (17Nov-26Nov)		Concept of soil stabilization, necessity of soil stabilization, different methods of soil stabilization. California bearing ratio (CBR) test - Meaning and Utilization in Pavement Construction Necessity of site investigation and soil exploration: Types of exploration, criteria for deciding the location and number of test pits and bores. Field identification of soil – dry strength test, dilatancy test and toughness test

Civil Engineering Department

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : Civil Engineering

Semester: 3rd Sem

Session : Aug-Nov 2025

Subject: Construction Material Lab

Name of the teacher : Er Neha Thakur

Designation: Lecturer Civil Engg.

Sr No	Week / Month	Contents taught	Remarks
1	1st (04Aug- 08Aug)	Introduction to Practicals and Equipments. Identify various sizes of available coarse aggregates from sample of 10 kg in laboratory and prepare report (60,40, 20,10 mm)	
2	2nd (11Aug- 14Aug)	Identify the available construction materials in the laboratory based on their sources.	
3	3rd (18Aug- 23Aug)	Identify the grain distribution pattern in given sample of teak wood in the laboratory and draw the various patterns. (Along and perpendicular to the grains)	
4	4th (25 Aug - 30Aug)	Identification of rocks from the given specimen. Prepare the lime putty by mixing lime (1 kg) with water in appropriate proportion and pre-prepare report on slaking of lime	
5	5th (01Sep- 06Sep)	Identify various layers and types of soil in foundation pit by visiting at least 3 construction sites in different locations of city and prepare report consisting of photographs and samples. Part I	
6	6th (08 Sep -12 Sep)	Identify various layers and types of soil in foundation pit by visiting at least 3 construction sites in different locations of city and prepare report consisting of photographs and samples. Part II	
7	7th (15 Sep- 20 Sep)	Select first class, second class and third-class bricks from the stake of bricks and prepare report on the basis of its properties	
8	8th (22Sep- 27 Sep)	Measure dimensions of 10 bricks and find average dimension and weight. Perform field tests- dropping, striking, and scratching by nail and correlate the results obtained.	
9	9th (29 Sep -04 Oct)	Identify different types of flooring tiles such as vitrified tiles, ceramic tiles, glazed tiles, mosaic tiles, anti- skid tiles, checkered tiles, paving blocks and prepare report about the specifications.	
10	10th (06 Oct- 10 Oct)	Apply the relevant termite chemical on given damaged sample of timber. Identify the type of glasses from the given samples.	
11	11th (13 Oct-18 Oct)	2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025)	

12	12th (21 Oct-25 Oct)	Apply two or more coats of selected paint on the prepared base of a given wall surface for the area of 1m x 1m using suitable brush/rollers adopting safe practices. Part I	
13	13th (27 Oct-01 Nov)	Apply two or more coats of selected paint on the prepared base of a given wall surface for the area of 1m x 1m using suitable brush/rollers adopting safe practices. Part II	
14	14th (03 Nov -07 Nov)	Prepare the cement mortar of proportion 1:3 or 1:6 using artificial sand as a special processed construction material.	
15	15th (10 Nov-15 Nov)	House Test (Centralized)	
16	16th (17Nov-26Nov)	Prepare mortar using cement and Fly ash or Granite/marble polishing waste in the proportion 1:6 or 1:3.

Government Polytechnic Kullu at Seobagh Distt Kullu H.P. 175138

Department of Civil Engineering

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : Civil Engineering

Subject: Basic Surveying Lab (CEPC215)

Semester: 3rd Sem

Name of the teacher : Er Naveen Bharti

Session: Aug- Nov 2025

Designation : Lecturer Civil Engg

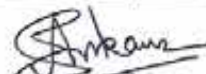

Sr No	Week/Month	Contents	Remarks
1	1st (01Aug- 08Aug)	Measure distance between two survey stations using chain, tape and ranging rods when two stations are inter-visible.	
2	2nd (11Aug- 14Aug)	Undertake reciprocal ranging and measure the distance between two stations.	
3	3rd (18Aug- 23Aug)	Determine area of open field using chain and cross staff survey.	
4	4th (25 Aug - 30Aug)	Measure Fore Bearing and Back Bearing of survey lines of open traverse using Prismatic Compass.	
5	5th (01Sep- 06Sep)	Measure Fore Bearing and back bearing of a closed traverse of 5 or 6 sides and correct the bearings and included angles for the local attraction.	
6	6th (08Sep -12Sep)	1st Class Test Undertake Survey Project with chain and compass for closed traverse for minimum 5 sides around a building.	
7	7th (15Sep- 20Sep)	Plot the traverse on A1 size imperial drawing sheet for data collected in Survey Project mentioned at practical No.6.	
8	8th (22Sep- 27Sep)	Undertake simple levelling using dumpy level/ Auto level and levelling staff.	
9	9th (29Sep -04Oct)	Undertake differential levelling and determine Reduced Levels by Height of instrument method and Rise and Fall Method	
10	10th (06Oct- 10Oct)	Undertake fly levelling with double check using dumpy level/ Auto level and levelling staff.	
11	11th (13Oct-18Oct)	2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025) Undertake Survey Project with Levelling instrument for Profile levelling and cross- sectioning for a road with cross-section.	
12	12th (21Oct-25Oct)	Plot the L-section with minimum 3 cross-sections on A1 size imperial sheet for data collected in Survey Project mentioned at practical No.11.	

13	13th (27Oct-01Nov)	Undertake Survey Project for plotting contour map using block contouring method for a block of 150m x 150m with grid of 10m x 10m.	
14	14th (03Nov -07Nov)	Plot the contours on A1 size imperial drawing sheet for data collected in Survey Project mentioned at practical No.13.	
15	15th (10Nov-15Nov)	House Test (Centralized)	
16	16th (17Nov-26Nov)	Measure area of irregular figure using Digital planimeter.

Civil Engineering Department

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : **Civil Engineering**

Semester: **3rd Sem. (Group 1 & 2)**

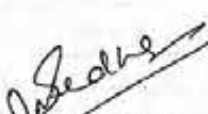

Session: **Aug- Nov 2025**

Subject: **Mechanics of Materials Practical**

Name of the teacher : **Er Sumedha Sharma**

Designation : **Lecturer Civil Engg.**

Sr No	Week / Month	Topics to be covered	Remarks
1	1st (04Aug- 08Aug)	Study and understand the use and components of Universal Testing Machine (UTM).	
2	2nd (11Aug- 14Aug)	Perform Tension test on mild steel as per IS:432(1).	
3	3rd (18Aug- 23Aug)	Perform tension test on Tor steel as per IS:1608, IS:1139.	
4	4th (25 Aug - 30Aug)	Determine Water Absorption on bricks per IS:3495 (part II), IS:1077 or tile IS:1237.	
5	5th (01Sep- 06Sep)	Determine Compressive strength of dry and wet bricks as per IS:3495(part I), IS:1077.	
6	6th (08 Sep -12 Sep)	1st Class Test & Revision	
7	7th (15 Sep- 20 Sep)	Conduct Abrasion Test on flooring tiles (anyone) e.g., Mosaic tiles, Ceramic Tiles as per IS: 13630 (part7),	
8	8th (22Sep- 27 Sep)	Cement Tile as per IS: 1237. Perform Single Shear and double shear test on any two metals e.g., Mild steel/ brass/aluminium/copper / cast iron etc as per IS:5242.	
9	9th (29 Sep -04 Oct)		
10	10th (06 Oct- 10 Oct)	Plot Shear force and Bending Moment diagrams for simply supported beams.	
11	11th (13 Oct-18 Oct)	2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025)	
12	12th (21Oct-25 Nov)	Conduct Flexural test on timber beam on rectangular section in both orientations as per IS:1708, IS:2408.	
13	13th (27 Nov-01 Nov)	Conduct Flexure test on floor tiles IS:1237, IS:13630 or roofing tiles as per IS:654, IS:2690.	
14	14th (03 Nov -07 Nov)	Revision	
15	15th (10 Nov-15 Nov)	House Test (Centralized)	
16	16th (17Nov-26Nov)	Revision

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : Civil Engg.

Semester: 3rd Sem

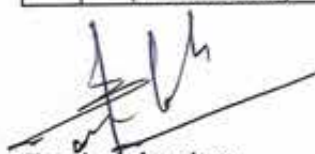

Session: Aug- Nov 2025

Subject: Concrete Technology Lab (CEPC219)

Name of the teacher : Er. Parveen Kumar

Designation : Lecturer Civil Engg

Sr No	Week / Month	Practicals to be performed	Remarks
1	1st (01Aug- 08Aug)	Determine fineness of cement by Blaine's air permeability apparatus or by sieving.	
2	2nd (11Aug- 14Aug)	Determine specific gravity, standard consistency, initial and final setting times of cement.	
3	3rd (18Aug- 23Aug)	Determine compressive strength of cement.	
4	4th (25 Aug - 30Aug)	Determine silt content in sand.	
5	5th (01Sep- 06Sep)	Revision	
6	6th (08Sep -12Sep)	Determine bulking of sand.	
7	7th (15Sep- 20Sep)	Determine bulk density of fine and coarse aggregates.	
8	8th (22Sep- 27Sep)	Determine water absorption of fine and coarse aggregates.	
9	9th (29Sep -04Oct)	Determine Fineness modulus of fine aggregate by sieve analysis.	
10	10th (06Oct- 10Oct)	Determine elongation and flakiness index of coarse aggregates.	
11	11th (13Oct-18Oct)	Revision	
12	12th (21Oct-25Oct)	Determine workability of concrete by slump cone test.	
13	13th (27Oct-01Nov)	Determine workability of concrete by compaction factor test.	
14	14th (03Nov -07Nov)	To prepare concrete mix of a particular grade and determine compressive strength of concrete for 7 and 28 days.	
15	15th (10Nov-15Nov)	Demonstration of NDT equipment.	
16	16th (17Nov-26Nov)	Revision

Lesson Plan w.e.f 01/08/2025 to 26/11/2025

Branch : **Civil Engineering**

Subject: **Geotechnical Engg. Lab**

Semester: **3rd Sem**

Name of the teacher : **Er Neha Thakur**

Session : **Aug-Nov 2025**

Designation: **Lecturer Civil Engg.**

Sr No	Week / Month	Contents taught	Remarks
1	1st (01Aug- 08Aug)	Introduction to Practicals And Equipments	
2	2nd (11Aug- 14Aug)	Identification of rocks from the given specimen	
3	3rd (18Aug- 23Aug)	Determine water content of given soil sample by oven drying method as per IS: 2720 (PartII).	
4	4th (25 Aug - 30Aug)	Determine specific gravity of soil by pycnometer method as per IS 2720 (Part- III)	
5	5th (01Sep- 06Sep)	Determine dry unit weight of soil in field by core cutter method as per IS 2720 (Part- XXIX).	
6	6th (08 Sep -12 Sep)	Determine dry unit weight of soil in field by sand replacement method as per IS 2720 (Part XXVIII)	
7	7th (15 Sep- 20 Sep)	Determine Plastic Limit along with Plasticity Index of given soil sample as per IS 2720 (PartV).	
8	8th (22Sep- 27 Sep)	Determine Liquid Limit along with Plasticity Index of given soil sample as per IS 2720 (PartV).	
9	9th (29 Sep -04 Oct)	Determine Shrinkage limit of given soil sample as per IS 2720 (Part- V)	
10	10th (06 Oct- 10 Oct)	Determine grain size distribution of given soil sample by mechanical sieve analysis as per IS 2720 (PartIV)	
11	11th (13 Oct-18 Oct)	2nd Class Test & Diwali Vacation (16/10/2025 to 18/10/2025)	
12	12th (21 Oct-25 Oct)	Use different types of soil to identify and classify soil by conducting field tests-through Visual inspection, Dry strength test.	
13	13th (27 Oct-01 Nov)	Use different types of soil to identify and classify soil by conducting field tests-, Dilatancy test and Toughness test.	
14	14th (03 Nov -07 Nov)	Determine coefficient of permeability by falling head test as per IS 2720 (Part- XVII)	
15	15th (10 Nov-15 Nov)	House Test (Centralized)	
16	16th (17Nov-26Nov)	Determine MDD and OMC by standard proctor test of given soil sample as per IS 2720 (Part VII).
